DR. CAILLE'S PROBLEMS

Now that General De Gaulle is firmly established in the government, in Paris, the skeptics are beginning to size up his assets and liabilities. The consensus is that the General faces a tough job.

In the wide enthusiasm which brought him to power, enthusiasm which encompassed all Africa, not much was found to say one way into the heart of Paris, a waste of destructive energy over France which was impressive. However, as is so typical of the French, now that the joy and the shouting is over the sacrifices and hardwork are at hand.

Some of the problems De Gaulle faces problems in both Africa from two directions. The extreme Right, many of whom are in favor of keeping the free overseas functioning, is not completely pleased with General De Gaulle's actions thus far. Moreover, the rebels have fairly organized De Gaulle's sport terms, and are set to continue the fighting.

General De Gaulle has promised a referendum within three months, and after the referendum is over, he must face the task of suppressing the rebellion, bringing it course to the autonomy of the rule.

De Gaulle also faces the stark task of demobbing of Frenchmen at home that they submit to constitutional reforms. Among other problems, he faces the problems of finances. If he could get the French to accept a fair tax program, and pay their taxes and—its other wordsaccept their individual obligation as responsible citizens—he would have done something which has been badly needed for many years, and which so many other French leaders have failed to accomplish.

But, in addition to these problems, he must revise the constitution, set up a governmental relationship which can function effectively, and improve France's international prestige. All in all, difficult days are in prospect for De Gaulle.

ELMER DAVIS

In the recent passing of Elmer Davis, the country lost one of its great newsmen. Millions remember the voice that seemed to analyze the war news during the second World War just little more clearly than others.

Shortly after it began he became OWI director and in later years dropped largely from the public view. Nevertheless his standards, in the field of news reporting in the thirties and early forties were a mark to be shot at by others in the news reporting field.

Perhaps his greatest distinction, to our way of thinking, was in removing the personal and acting out of news reporting. When he began back in 1929, his calm and deliberate style was not exactly the accepted mode in the radio field.

About The Home

Lawn edging has been made easy by a narrow strip of metal or plastic inserted in the ground. The result is a barrier to sufarce and underground growth.

Lawn edging was originally designed to keep turf areas from encroaching on flower and shrub beds. However, now it is being put to many other uses. It is perfect to construct a strawberry pyramid. The layers of soil can be built up as high as six layers.

It is perfect to retain the soil in free-form terracing on gentle slopes. It keeps the lawn in place and the soil from washing away while the grass is taking hold.

Lawn edging can be placed around specimen trees and shrubs to keep a mulch in place or to hold irrigation water.

Try it along garden paths or pathways to keep gravel or pine straw in place, and to keep the weeds out. It will make a perfect divider for sections in seed flats. Use it to mark off a formal garden.

Lawn edging can be bought in your garden supply store. It is sold under many trade names in steel and aluminum metals, and plastics. Almost all types are corrugated for extra strength. The average width is four inches. There are also widths of six to eight inches for southern gardens where a deeper edging is needed to stop the spread of deep grass roots.

All the Details

"Have you ever appeared as a witness in a suit before?" the counsel asked the girl in the witness box.

"Why, of course," she replied. "Will you tell the jury what suit it was?"

The information came promptly: "It was a blue suit, with white collar and cuffs, and buttons all the way down the front."
